Efficiency Reduces Haifa Porter Rates

Jerusalem Post Reporter

HAIFA, Tuesday. — Portage charges for export goods sent through Haifa port have been considerably reduced by an order issued last Thursday, it was learned here today.

The reduction was made possible through greater efficiency at the port and the addition of more quay space which obviates the need for double handling of goods.

Lighters to the breakwater where the ships had to anchor for lack of room at the quay.

Goods exported by "direct delivery" in, if loaded on ships directly from the truck or rail car that brings them to the port, receive the bigger reductions.

(Portage is the handling of cargo from the quay to the ship but not the handling inside the vessel.)

The order details the reductions for 14 different types of goods, with other goods receiving a flat rate reduction of 10 per cent from the present 12 sh. per ton.

The only goods not affected by the order are cargoes sent in bulk, which include phosphates, potash, pyrites and other minerals.

For goods sent by indirect delivery, reductions are smaller. It is learned that negotiations are continuing for a general reduction of handling charges for all goods imported as well as exports. The new order also affects the Kishon harbour.

Full Employment In Haifa Port

HAIFA, Tuesday. — Work at the port is well advanced with some 3,000 men at work. Of these, 1,800 are temporary labourers sent by the Labour Exchange.

It is learned that the labourers are unwilling to put in overtime as they have declined 40 per cent of the extra earnings for income tax, making it not worthwhile. It was learned that there was plenty of overtime work, especially for the experienced men.

Yesterday, a total of 3,245 tons were handled in the Port, including the Kishon area, where two ships were loaded. Altogether, 18 ships were handled yesterday, while five more are waiting in the Bay. Today, another five cargo ships are expected.

Number of Jobless At Record Low

TEL AVIV, Tuesday. — The average daily number of unemployed dropped to 3,800 in the week ending April 9, the lowest figure in the last five years, the Ministry of Labour announced yesterday.

The low figure, 200 less than the previous week, was achieved mainly through special Passover work projects.

The unemployed included 1,255 unskilled workers. In Tel Aviv there were no unemployed registered; in Haifa, 328; in Jerusalem, 671; in Petah Tikva, 115, and in Ramat Gan, 102.

Compulsory Savings in Sweden
A scheme of compulsory saving amounting to 10 per cent of the amount deductible at taxation on private income is being introduced in Sweden. The Swedish Government is from part of the increased purchasing power resulting from the recent wage increases. The scheme is planned to include company income. It is expected to yield about Kr.1,000m. (\$100m.) which is to be invested primarily in Government bonds. A plan for encouraging voluntary savings is also reported in preparation. Sweden's balance of payments resulted in a deficit of Kr.111m. in 1954 against a surplus of Kr.80m. a year before, mainly because of the rise in imports (33 per cent) which overtook the 7 per cent rise in exports.

The German economy is running 27 per cent above 1954 (many are being shipped to the U.S.) and the January steel output was 20 per cent higher than a year ago. Demand for steel is particularly brisk at shipyards and in steel products trade. For most steel products delivery is up to seven months. In the first two months of this year German exports were 25 per cent higher than last year but the import advance was 30 per cent.
